

Shreyas Deshpande

San Francisco, CA | (408) 431-8940 | shreyasjd777@gmail.com | [linkedin.com/in/shreyasjd](https://www.linkedin.com/in/shreyasjd)

EDUCATION

University of Illinois, Urbana-Champaign | *Computer Science, M.S.*

- **Certifications/Awards:** Coursera Deep Learning, Coursera Machine Learning, Udemy Web Development, Dean's Honor List
- **Relevant Coursework:** Data Structures and Algorithms, Artificial Intelligence, Information Retrieval, Database Management Systems, Linear Algebra, Discrete Mathematics, Multivariable Calculus, Object Oriented Programming
- **Organizations/Leadership:** Theta Tau Professional Engineering Fraternity (Webmaster)

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, SQL, HTML, CSS, C++, Bash, LaTeX
- **Frameworks & Libraries:** React.js, Node.js, Express.js, Next.js, React Native, Flask, Django, Tailwind
- **Databases:** PostgreSQL, Supabase (auth, db, storage), Firebase (auth, db, storage)
- **Tools & Methodologies:** Cursor, Claude Code, Git, Docker, REST API, CI/CD, Agile, Google Cloud, Render, Vercel, Expo

WORK EXPERIENCE

ShriddleShreds Barbershop | *Founder*

[\[shriddleshreds.com\]](https://shriddleshreds.com) | May 2020 - Present

- **Engineered** a full-stack booking platform (Next.js, Flask, Stripe) with a **real-time availability engine** and webhook-driven payment reconciliation, maintaining data integrity across records for **100+ monthly appointments**
- **Architected 10+ REST API endpoints** with idempotency keys and database-level constraints to safely handle retries and prevent duplicate transactions, avoiding race conditions and achieving **0 booking conflicts**
- **Developed an LLM-driven chatbot** that streamlines natural language input into **automated booking workflows** while providing decision support for clients, increasing customer conversion rates by **20%**

UCR Undergraduate Education IT | *Senior Tech Assistant II*

February 2023 - October 2024

- **Built and maintained** web pages for **20+ campus organizations**, reliably fulfilling requests from **50+ staff/faculty** to design user-friendly layouts, create engaging graphics, and provide up-to-date content
- **Diagnosed and resolved** hardware/software issues including system, network, application, and settings configuration for **50+ staff/faculty**, improving system uptime and reducing recurring support requests

Shrocken Inc. | *Software Engineering Intern*

June 2022 - September 2022

- **Led** a team of 3 engineers in **daily** scrums to build a demo messaging app using Mendix, **evaluating** the platform for a website migration by analyzing developer workflows, integration capabilities, and end-user performance

PROJECT EXPERIENCE

UCR Undergraduate Education Visionboard | *Front End Engineer*

[\[ue.ucr.edu/rvision-v3\]](https://ue.ucr.edu/rvision-v3)

- **Developed** an interactive application for UCR, promoting visibility for **20+ student success programs** to **10,000+ students**, enabling an increase of engagement through dynamically branded content
- **Drove an increase** in user retention by **10% year over year** by promoting academic support initiatives and allowing students to create personalized action plans, which contributed to a decrease in undergraduate dropout rates by **2%**

CamJam | *Full Stack Engineer*

In Production

- **Built** a React Native photo/video sharing app and **optimized** the media pipeline using client-side thumbnail generation and caching, reducing gallery load times by **40%** and supporting smooth rendering of **100+ media items per session**
- **Architected** a scalable Firestore data model with atomic updates, real-time listeners, and **offline-first sync** using local state buffering and retry-safe writes, maintaining **<200ms** latency and ensuring consistent multi-user state

Tindergram | *Full Stack Engineer*

[\[tindergram.dev\]](https://tindergram.dev)

- **Engineered** a privacy-first social media management tool with recursive JSON parsing, validation, and deduplication, improving list computation efficiency and reducing processing time by **35%** on large datasets
- **Developed** an automation system with DOM manipulation and scripting to execute user actions programmatically with **retry/backoff** strategies, **rate-limit** safeguards, and **batching**, improving execution **reliability** and reducing manual effort by **80%**

Theta Tau, Sigma Delta Website | *Front End Engineer*

[\[thetatauucr.com\]](https://thetatauucr.com)

- **Redesigned** the organization website with responsive, **mobile-friendly** layouts, **modern** UI components, and improved navigation, increasing new member interest by **30%** and receiving positive feedback from **50+ members**
- **Led** a team of 5 engineers in **Agile sprints**, coordinating weekly progress and aligning development efforts, **resulting in cohesive execution** and timely product delivery
